## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-22 are allowed.

### ***Reasons for Allowance***

2. The following is an examiner's statement of reasons for allowance: The primary reason for the allowance of claims 1-6 is the inclusion of the following limitations: 'such that said compressed test data is stored in said memory space of said memory to maximize said memory space of said memory to be utilized for storing a complete series of said test data of said test sample; and a transmission interface electrically connected to said control circuit for connecting to a computer having a display means, wherein when said memory space of said memory is used up, said control circuit fetches said test data in said memory for directly transmitting said fetched test data to said computer through said transmission interface so as to display said fetched test data on said display means'.

The primary reason for the allowance of claims 7-12 is the inclusion of the following limitations: 'such that said compressed test data is stored in said memory space of said memory to maximize said memory space of said memory to be utilized for storing a complete series of said test data of said test sample; a display means electrically coupled to said compressor wherein when said memory space of said memory is used up said control circuit fetches said test data in said memory to display said fetched test data on said display panel'.

The primary reason for the allowance of claims 13-22 is the inclusion of the following limitations: 'storing said compressed test data in said memory to maximize a memory space of said memory to be utilized for storing a complete series of said test data of said test sample; and displaying said test on a display panel which is electrically coupled with said compressor wherein when said memory space of said memory is used up said control circuit fetches said test data in said memory to display said fetched test data on said display panel'.
